What is an Individualized Learning Plan?

A student Individualized Learning Plan is a formal and prescribed collection of materials produced in a variety of media that documents student academic, personal/social and career development. ILP contents, representing the major student products of the K-12 counseling curriculum, are the core of information utilized in carrying out the student and parent academic/career conference agenda, conference activities, meeting the student's conference goals and outcomes, and assessing the predetermined conference benchmarks.

Rationale for the Individualized Learning Plan

In order for students to have a successful transition from middle school to high school, high school to work, postsecondary education, or the military, instruction in career awareness is necessary. Students need a structured framework in selecting educational programs and careers that will lead to personal satisfaction. Career awareness, exploration, planning, and management provide the stages for educators to prepare youth to enter their chosen occupations.

A comprehensive career awareness and exploration plan should include self and career awareness at the elementary level. Students at this level should be introduced to careers in the community and region; examine relationships between learning and working; explore opportunities of various careers; and investigate the inter-relationship of life roles, life styles, and careers.

Students at the middle school level should explore career options in various fields. They need to examine requirements for a variety of careers; demonstrate knowledge of the inter-relationship of life roles, life styles, and careers; examine the relationship of educational achievement to career opportunities; identify personal strengths and weaknesses; investigate a variety of careers; analyze findings in terms of interest and abilities. By the end of middle school, they should develop an initial Individual Learning Plan, which matches their current interest.

High school level students should focus their educational and career goals and revise their Individual Learning Plans as needed. Students at this level will investigate the inter-relationship of educational achievement, life goals, career planning, training and placement; evaluate the present job market and analyze predictions of future trends at local, regional and global levels; and propose career options based on their existing Individual Learning Plan.

Vital to the educational process at each of these grade levels is the involvement of parents, business/industry and the community.

The Individual Learning Plan is a 4+ year plan developed during Middle School that promotes academic and career development for ALL students.

The Individual Learning Plan is a tool that helps students set and achieve learning goals based on academic and career interests.

An Individual Learning Plan may be implemented via:

- Student and Parent Educational/Career Planning Conferences***
- Advisor/Advisee Programs***
- Required career courses***

The key to the successful implementation of an Individual Learning Plan is planning.
Planning must be done thoughtfully, carefully, and thoroughly.

Planning for the Individualized Learning Plan

Student and Parent Educational/Career Planning Conferences:

- Calendared time
- Benchmarks being met
- Information and Data needed
 - Academic records
 - Pre-vocational experiences
 - Achievement tests
 - Interest Inventories
 - Learning Styles
 - Attendance
 - Personal Goals
 - Social or Work history
- Conference procedures and length
- Correspondence
 - Schedule
 - Confirmation
- Framework checklist
- Parent resources
- Evaluation or feedback forms
- Portfolio format and content
 - Assessment records
 - Letters of application
 - Letters of recommendation
 - Record of work experience
 - Academic and career-related coursework
 - Sample job and/or college application
 - Awards
 - References
 - Resume
 - Samples of work, photos, videos, etc.

Components of the Individualized Learning Plan by Grade Level:

The Individual Learning Plan is based upon student information from academic records, career interest, aptitude, and learning style inventories.

Student defined career goals.

Identification of services needed for the student to make a successful transition from Middle School to High School and High School to desired postsecondary setting.

Information for developing a resume, such as education, work experiences, school and community activities.

Individual Learning Plan (ILP) Grade Level Components Middle School

6th Grade
